GENERAL TECHNICAL CRITERIA

Technical Expertise and Experience

Technical Expertise and Experience Explained:

This form documents that the you have had at least 8 years of progressively responsible experience in the appropriate engineering discipline. Incorporated into these criteria is a requirement to possess knowledge of those fundamentals common to all engineering disciplines. This form is also used to determine the Delegated Functions/Authorized Areas that are the basis for the scope of appointment. You must list at least three references and include telephone numbers at which they may be reached during normal business hours Monday through Friday. These references must be persons who have first-hand knowledge of your technical abilities. These persons must possess the technical knowledge necessary to make such a judgment regarding your technical ability. Although not required, it will be helpful if these references are persons known to the Aircraft Certification Service. You must include supplementary documentation which verifies that you possess appropriate engineering knowledge. This may be done by listing an engineering degree from an accredited university, by indicating you have successfully completed the Engineer-In-Training test of a state's Professional Engineering Registration program, or by documenting experience and education by which you have gained the basic knowledge common to all engineering disciplines.

GENERAL STANDARDIZATION CRITERIA

Knowledge of the Standardized FAA DER System

Knowledge of the Standardized FAA DER System Explained:

This form is used to document your knowledge of DER responsibilities, authority, limitations, activities, and procedures while serving as a representative of the FAA Administrator in the FAA certification process. The certificate of completion of the DER Initial Seminar that you are provided upon successful completion of the seminar is used as evidence of your knowledge of DER functions. Submittal of a copy of this record of completion of the DER Initial Seminar is required by you before appointment or identification as a candidate. You may also list other experience, training, etc., that has helped you gain this knowledge. If evidence of completion of the DER Initial Seminar is not found recorded in the training section of the DIN, the appointing office will update the training file accordingly.
